A photograph of two women standing outdoors. The woman on the left has bright red hair and is wearing a blue and white floral patterned top. The woman on the right has long dark hair and is wearing a colorful patterned top. They are both looking at a white smartphone held by the woman on the right. In the background, there are power lines and a cloudy sky.

What is the Revolving Fund?

The revolving fund is a payment facility set up by the Government with the support of the World Bank to enable low-income households to obtain an electricity connection from ENEO, thereby promoting access to electricity to a wider set of people. The Revolving Fund is based on the concept of getting an electrical connection on credit, with a repayment plan spread over a long period depending on various repayment options. In the pilot phase of implementation of the Revolving Fund, 163 000 connections will be completed.

Some opportunities and advantages of the Revolving Fund...

The Government through PERACE pre-finances electricity connections, thereby offering an opportunity to a significant number of households with low purchasing power, to have access to electricity.

The revolving nature of the Fund, which is replenished through a repayment cycle, guarantees its sustainability, thus enabling access to a significant number of households to have an electrical connection, particularly those in underserved regions.

No interest rate is charged, the amount to be repaid is equal to the total cost of installing the electrical connection.

Each household negotiates the repayment period related to the cost of their electrical connection, provided it does not exceed two years.

Different connection options are available (two wires and four wires) and adapted to households and the promotion of income-generating activities.

The prices of electrical connections are validated by ARSEL.

Revolving Fund Coverage Plan

The revolving fund is an electrical connection payment facility designed to be sustainable. As such, it includes:

A PILOT PHASE

1

Where in the Fund will be open to households and small businesses located in the semi-urban areas and outskirts of the following cities: Maroua, Garoua, Lagdo, Ngaoundéré, Yaoundé, Mbalmayo, Abong-Mbang, Ebolowa, Kribi, Bafoussam, Douala, Edéa, Limbé, Buea.

AN OPERATIONAL PHASE

2

Based on the lessons learned from the pilot phase, the Fund will be scaled up and will be available to all households and small businesses located in the 687 localities to be electrified by PERACE.

LONG-TERM SUSTAINABILITY PHASE

3

Focused on the execution of the Government's guidelines pertaining to the development of the electricity sector, in particular the continued implementation of programs targeting electricity connections.

Main eligibility criteria to benefit from the Revolving Fund in its pilot phase

Be located within a maximum distance of 100 meters from a low voltage electricity network

Voluntarily subscribe to the Revolving Fund.

How to benefit from it?

I fill the subscription form and I provide all the required documents.

Or

From a smart phone, I download the subscription form online on the website: www.aerfondsrevolving.com . I fill the form and the provide all the required documents

Composition of the file

The connection request file includes:

-  The Revolving Fund membership form duly completed and signed.
-  A photocopy of the National Identity Card.
-  A location plan.
-  A Unique Identifier Number/Taxpayer Card or Registration Certificate (MINFI).
-  A copy of the lease contract (if you are a tenant)/ Title deed.

Why trust the Revolving Fund?

Transparency and traceability of the mechanism ensured by:

A control system of reimbursements made by households from an integrated digital platform for mobile payments managed by CAMPOST.

Constant progress monitoring and evaluation performed by an ad hoc committee comprised of representatives of PERACE, MINEE, AER and ARSEL.

Quality control and assurance of works performed, and the observance set deadlines for the realization of electrical connections, in accordance with the Electricity Distribution Service Regulation, by an independent engineer recruited by the PERACE

a toll-free number **8566** (free of charge) for customer service and the management of complaints and claims from households.
